Jefferson County.

[From the Oskaloosa Independent.] We have received an unusually large num ber of letters of inquiry about Kansas and Jefferson County during the past few weeks Inquiries have come in from all directions, and from almost all classes of people. We give some general answers in our columns, intending to follow up with a full and reliable description of the State and county in subsequent numbers. Many of our readers are familiar with these facts, but we repeat them for the benefit of others, who are not so well posted:

SOIL AND PRODUCTS. The soil of this county, as of the State i general, is excellent. Corn, wheat, and all small grains, do well, and produce in great abundance. On upland prairie 105 bushels of corn has been raised to the acre by measprement. Root plants and all kinds of vegetables grow to perfection. There is no crop that does not grow well in this county if properly cultivated. The soil is much easier farm and keep in order than in most of the older States. Farmers say that a hand

most excellent flavor. Apples, pears, cherries, plums, peaches—all do well, while strawberries, rasberries, grapes, and all kindred fruits develop most splendidly. As a fruit-growing State Kansus ranks among the control of the straight of the control of the summarily hanging the drover, but he was allowed to depart without personal injury. We did not learn his name.

Now this at first sinks. fruit-growing State Kansas ranks among the first, and Jefferson County is one of the very best in the State for fruit.

TIMBER AND WATER. Jefferson is one of the best timbered coun rather on the increase than otherwise. Oak walnut, ash, hickory, elm, &c., abound, and in some places the soft maple. The county is well watered. The Kaw River is its southern boundary line for twenty-five miles, Grasshopper River runs through it from north to south. Slough, Walnut, Rock, Crooked, Mud, Cedar, Muddy, Buck, and many other smaller creeks run through different portions of its territory. Springs abound; and in digging for wells water can be reached in from fifteen to fifty feet—an average of about twenty to twenty-five feet. In most parts of the county the water is of excellent quality.

MINERALS AND STONES. Indications of the presence of various ores are found, but, except stone-coal. no minerals have been mined. Stone-coal exists at a depth of about three to four hundred feet under all the county. It is found cropping out at various places, and is being mined at neveral points. Stone abounds in most parts of the county, in great abundance and of exor magnesian lime-stone, almost equal to marble, has been discovered, and bids fair to be a source of wealth, as well as formal and the country of the country, in great abundance and of excellent quality; and in some places the white several bushels of apples, shaken premature-ly from the tree on which his wife hung hereful. be a source of wealth, as well as furnishin to hand a most beautiful and cheap buildin

THERIN TIMES ties. In the winter season, the winds are often quite high and piercing, requiring a little extra clothing to protect the person, especially to delicate individuals. But the air is dry and free from the dampness which makes high winds in other countries so hard upon the constitution. There are frequent changes of weather, and these are sometimes very sudden. But the health of the people is remarkably good on the average. There is, probably, no healthis Bute in the Union.

there are ten towns and villages in the county, ranging in population from forty or fifty to six hundred, and most of them are in thriving condition. Many farms are in a fine state of cultivation, with excellent houses and other buildings, and hundreds of the county in the same state of advances are approaching the same state of advances are approached to the vanced development and comfort. There are yet thousands of arees of naimproved in the multitude of its elements and the perland, ranging in prices from \$3 to \$30 per acre, according to location and other advantages or disadvantages. Immigrants will find this an excellent part of the State to come to in order to secure homes.

RAILROADS. The Kansas Pacific Railroad runsthrough he southern part, almost the entire length from east to west. Other roads are under contract, with the promise of speedy con-struction, and when complete according to the plans agreed upon, the county will be well supplied with these great and necessary means of communication and trade. The county is in a prosperous condition Crops are good, the people are industrious and generally enterprising, and the tide of success is flowing steadily on. Now is the The sooner they come the better for them. We advise all who visit Kansas to examine Jefferson county.

Yesterday was another day of victory, the results of which cannot as yet be defined. At an early hour yesterday the Twelfth and Ninth army corps and the Guards advanced owards the north road from Metz to Verdun as far as St. Marcel and Douncourt, and were followed by the Third and Tenth corps, while the Seventh and Eighth, and, afterwards, Second corps, halted at Rezonville, fronting toward Metz. As the first named corps turned to the right, through a thickly wooded country, in the direction of Verneville and St. Privat la Montague, the last named corps commenced the attack towards Gravelotte, but not in a decisive manner, in order to three corps, which were marching against the strong positions of Amanvillas and Chatel St. Germain, and up to the Metz turnpike road by a considerable detour. He was born in the first year of the century, at a farm known as Samow, near Ribnitz. His traditions were all military. His father had served in the Mollendorf regiment, and was resolved on giving a thorough soldiery training to his sons. Very soon after the birth of him whose career we are now briefly sketching, the family went to Holstein; and in the year 1812 he was sent with an elder brother to the Land Cadet Academy at Copenhagen, so that Prussia is indebted to Denmark as well as to the Duchy of Mecklenburg for the production of a soldier whose services will have left their mark in the history of this young but powerful monarchy. He was entirely dependent on his slender pay, for his nearest relatives had fallen on evil days, and their fortune was lost.

By great exertions and self-denial, Lieut. Moltke educated himself in midern languages, and his diligence obtained for him in short time the direction of the Division School, lin which post his duties were discharged with such eminent satisfac-tion to his superior officers that he was attaceed to the staff of General von Msiffling, and was employed to take topographical measurements in Selisia and elsewhere. Soon afterward he became Captain, and in two years was admitted to the General staff. While holding the rank of Captain he went to Turkey, with Captains Lahe, Von. Red River Troubles.

CHICAGO, Sept. 13-A St. Paul correspondent says: A gentleman from Fort Garry informed them that fierce exasperation prevails among the the French popula tion here at the perfidous violation of pledge made by the Canadian Government, and by mark, that he projected the successful passes over to Alsea. His fame was afterwards to be more firmly established. The seven days' war with Austria brought into troops was secured. This gentleman was told by Riel, that the day before the troops told by Riel, that the day before the troops arrived that all had been satisfactorily ar ranged and that he was awaiting news of the arrival of the newly appointed Governor Archibald, with his his troops to turn the government over to him until the arrival of troops within a few miles of Fort Garry, was confident that the arrangements would be carried out in good faith. That the troops had no other than pacific inten-tions which their commander and government had professed and that Archi-bald was to come before them and receive the government at his hands. These assurances had been given him by Bishop Lache on behalf of Gov. Archibald and he Canadian government, but at daylight on the 23d of August, word was brought to him that troops were advancing up Red River from the State Fort and were making prisoners of every body passing through their line. That they were in fighting array,

equiping horses and mounting them with reflemen, and with artillery lumbered and every preparation for battle.

Riel says at once that he had been deceived, and that there was alike demonstration sound. Joseph F. Gibbs, of St. Louis was the lowest bidder for beef viz. \$3.75 per undred, and J. W. Foster, of Carlisle Pa., was the lowest bidder for bacon, viz. 18 tents per pound.

Poor, unfortunate, Batrachian! In what a sad plight he must have been. And yet his misfortune was one that often befalls singers. Many a once tuneful voice among those who belong to the "genus homo" is ut-terly spoiled by "cold in the head," or lungs, or both combined. For the above mentioned "croaker" we are not aware that any remedy was ever devised; but we rejoice to know that all human singers may keep their heads clear and their throats in tune by a timely use of Dr. Sage's Catarrh Remedy, and Dr. Pierce's Alt.
